

New Jersey Center for Science, Technology, and Mathematics Education

18 December 2007

Dr. David Joiner
Center for Science, Technology & Mathematics Education
Kean University 1000 Morris Ave., T-117
Union, New Jersey 07083

Dear Dr. Joiner,

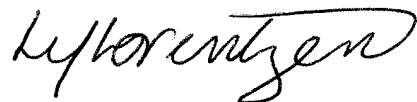

I am writing to support your proposal for hosting the SC08 Education Program summer workshop series at Kean University in Union NJ. On behalf of Kean's NJ Center for Science, Technology, and Mathematics Education, I am excited about the potential of such a workshop taking place on campus this coming summer 2008.

Indeed, Kean is excited to participate as a host site for the SC08 Education Program summer workshop series. This week-long intensive workshop on parallel computing with special sessions on HPC applications in Physics Education for faculty from Kean, Northern New Jersey, and the rest of the United States, will help to promote the New Jersey Center for Science, Technology, and Mathematics Education as a resource for math and science teachers throughout the state.

The Nathan Weiss Graduate College at Kean University through its Center for Science, Technology & Mathematics Education will fund your participation at the level of 1 academic credit hour of overload/summer pay for your assistance in this workshop as local host and as an instructor for the workshop.

I look forward to working on these matters with you in the future.

Sincerely,

Laura Y. Lorentzen, Ph.D.
Chairperson, Center for Science, Technology & Mathematics Education
